Ideal for both exterior and interior applications, our Selflok profiles offer versatility, allowing for horizontal or vertical installation\* with ease. Elevate your space with effortless style and timeless elegance.

Weatherboard size 3660mm x 300mm.

NEW traditional joiner also available for Selflok Vgroove 150mm Smooth.

## The Benefits of Selflok

Selflok CodeMark accredited weatherboards have the simplest unique horizontal tongued groove flush system, which allows every board to self gauge.

Lightweight product made from real Australian hardwoods.

Off stud joining option enables minimal waste and less timber stud layout.

No added silica, glues, resins or formaldehydes.

25 year warranty on Pre-primed Selflok weatherboards.

Curved walls can be achieved down to a minimum of 2.5m radius for Selflok.

To install Selflok vertically follow horizontal batten installation manual available on the Weathertex website.
