BIOHAZARD BODY FLUID SPILLS

CYTOTOXIC BODY FLUID SPILLS

CYTOTOXIC CHEMICAL SPILLS

Biohazard Body Fluid Spills

Body fluid and blood borne pathogens pose a risk if not handled properly.

A duty of care involves having appropriate materials available to safely clean-up a body fluid spill. To make it easy and help you to protect yourself and your staff, ZeoMed™ Spill Kits come complete with everything you need to clean up body spills.

Code: **ZEO-2S13**

What is a Body Fluid Spill?

The most common types of body fluid spills that occur in the workplace, at home or in public domains are vomit, blood, faeces and urine.

ZeoMed™ Spill Adsorbent Powder

Incorporates a pure form of zeolite, a naturally occurring mineral ideal for a spill kit. ZeoMed™ Adsorbent Powder is included in many ZeoMed™ Spill Kits.

Codes: **ZEO-Z006** – 200g Sachet
ZEO-Z00501 – 1kg Tub
ZEO-Z00505 – 5kg Tub

ZeoMed™ Odour & Moisture Control Rocks

A mesh pouch containing 1kg of the zeolite rock allowing the air to circulate and come in contact with the active surface.

Once the zeolite is saturated its odour absorption ability can be regenerated by placing the bag in direct sunlight for 24 hours. This will recharge the zeolite for reuse.

Code: **ZEO-Z105**

Training

At Enware we are aware of how important it is for you and your staff to receive up to date training on the correct use of spill kits when handling biohazard body fluid spills.

To assist you we have developed a comprehensive training video which can be used in conjunction with your own WHS training. Ideal for staff training and induction.

Find our Videos on YouTube: just search “ZeoMed™ biohazard spill kit video.”

It includes video footage and step-by-step actions for managing a spill using the ZeoMed™ Spill Kits.
